

Correlation Functions and Quasiparticle Interactions in Condensed Matter

Filesize: 2.58 MB

Reviews

A must buy book if you need to adding benefit. It is actually rally fascinating throgh studying time. Your way of life span will likely be transform as soon as you complete looking over this publication.
(Ms. Bernice Rolfson)

CORRELATION FUNCTIONS AND QUASIPARTICLE INTERACTIONS IN CONDENSED MATTER

DOWNLOAD

Book Condition: New. Publisher/Verlag: Springer, Berlin | This volume contains the proceedings of a NATO Advanced Study Institute devoted to the study of dynamical correlation functions of the form $\langle I \rangle J \sim e^{-i\omega t} \delta(t - T)$ is an equilibrium average. In equation (1) it is useful to regard the product AB as the product of two operators in cases in which A and B refer to different spatial points in a condensed matter system and/or in which A and B behave dynamically in a quasi-harmonic way. In the second case, one has a two quasiparticle correlation function and $CAB;AB(\omega)$ gives information about quasiparticle interactions. Condensed matter physics has increasingly turned its attention to correlation functions of this type during the last 15 years, partly because the two point and/or one-particle correlation functions have by now been very thoroughly studied in many cases. The study of four point and/or two quasiparticle correlations has proceeded somewhat independently in several diverse fields of condensed matter physics and it was one purpose of the institute to bring experts from these different fields together to describe the current state of their art to each other and to advanced students. | I. General Theory.- Kubo and Zubarev Formulations of Response Theory.- Perturbation Theory of Response Functions.- Renormalization Group Approach to Dynamic Critical Phenomena.- Nonlinear Response Theory.- II. Magnetic Systems.- Magnetic Excitations.- A Green Function Approach to Two-Magnon Light Scattering in Antiferromagnets at T_N .- Two-Spin Light Scattering in Heisenberg Antiferromagnets.- Two-Magnon Spectra of Ferromagnets.- Light Scattering Determinations of Dynamic Four Point Correlation Functions.- III.
