MODERN BIOPOLYMER SCIENCE: BRIDGING THE DIVIDE BETWEEN FUNDAMENTAL TREATISE AND INDUSTRIAL APPLICATION (HARDBACK)

Elsevier Science Publishing Co Inc, United States, 2009. Hardback. Book Condition: New. 236 x 193 mm. Language: English . Brand New Book. Industrialists developing new food and pharmaceutical products face the challenge of innovation in an increasingly competitive market that must consider ingredient cost, product added-value, expectations of a healthy life-style, improved sensory impact, controlled delivery of active compounds and last, but not least, product stability. While much work has been done to explore, understand, and address these issues, a gap has emerged between recent advances in fundamental knowledge and its direct application to product situations with a growing need for scientific input. Modern Biopolymer Science matches science to application by first acknowledging the differing viewpoints between those working with low-solids and those working with high-solids, and then sharing the expertise of those two camps under a unified framework of materials science. This title features real-world utilisation of fundamental science to achieve breakthroughs in product development. It includes a wide range of related aspects of low and high-solids systems for foods and pharmaceuticals. It covers more than bio-polymer science in foods by including biopolymer interactions with bioactive compounds, issues of importance in drug delivery and medicinal chemistry.
