Richmond Publishing Co Ltd, United Kingdom, 1992. Paperback. Book Condition: New. M. L. Askew (illustrator). Reprint. 204 x 148 mm. Language: English . Brand New Book. Most of us have noticed galls as bizarre and often colourful distortions of plant growth, and wondered what goes on inside them. The drama enacted within a single gall may involve many species of insects and mites. Their interrelationships are intricate and their identification has been challenging. The communities of insects and mites associated with galls of certain plants, when unravelled by specialists, have proved to be of great ecological interest. This book will make galls accessible to a wider audience. It introduces the wonderfully complex communities associated with galls, and provides keys for identification of the gall former, and many other occupants, including predators and parasites. To make this task manageable the authors have concentrated on galls associated with selected plant species, and have presented a food web to illustrate the relationships among the animals associated with each type of gall. Much remains to be discovered about these and other galls and their inhabitants. For the first time, this book brings that exploration within the scope of interested naturalists and students. Galls are often abundant and readily available systems for the study of ecology. Investigations undertaken at home or in schools and universities may help to advance our knowledge of these microcosms, and of the ecological interactions that they illustrate so compactly.
