Not illustrated. 1895 Excerpt: .many scientific men have come as far short in their judgments of men and of things as have any of those who knew nothing of science. In the teaching of physics it is assumed generally that one must become familiar with a great number of facts before he can be permitted to generalize at all. Professor Mach says substantially that it is not needful to know very much--that is, many details of a subject--in order to understand fundamental principles. If this idea were general, it would make much difference in the amount and kind of instruction given in schools of all grades. Finally, the lecturer takes a hand in the old controversy about the curriculum, and speaks as one familiar with the data on both sides of the question as to the relative value of classical and scientific educations. Altogether the book is a good one, and will serve a good purpose, both for instruction and suggestion. The translation, by Mr. T. J. McCormack, is well done; and the Open Court Company has put the work into a very presentable volume of three hundred pages. A. E. Dolbear. Some Recent Books Ox Social, Subjects. In this article we give a suggestion of the contents and points of view of a dozen or more writers who start from very different grounds. Five of these relate to some phase of socialism; one to the social management of dependents and defectives; and the others to special problems or local...
